

These requirements require you to SHOW. You have two options:

1. Send me pictures or video (following our e-mail and picture rules)
2. Show your Scoutmaster and let her/him approve requirement

REQUIREMENTS 3, 4, 5

(HOMEWORK)

Req. 3

(HOMEWORK) Show how you could safely save a person from the following:

- a) Touching a live household electric wire
- b) A structure filled with carbon monoxide
- c) Clothes on fire
- d) Drowning using nonswimming rescues
(including accidents on ice)

Req. 4

(HOMEWORK) Show three ways of attracting and communicating with rescue planes/aircraft.

Req. 5

(HOMEWORK) With another person, **show** a good way to transport an injured person out of a remote and/or rugged area, conserving the energy of rescuers while ensuring the well-being and protection of the injured person.

Example Req 3a

- When someone is electrocuted, their muscles tighten and they may be unable to let go.
- What to do:
 - Do not touch the electrocuted person.
 - Pull out the cord from the insulated portion.
 - Shut-off the power at the circuit breaker.
 - Push the person away using a wooden stick, rolled up newspaper, towel or other implement that doesn't conduct electricity.
 - Call 911!

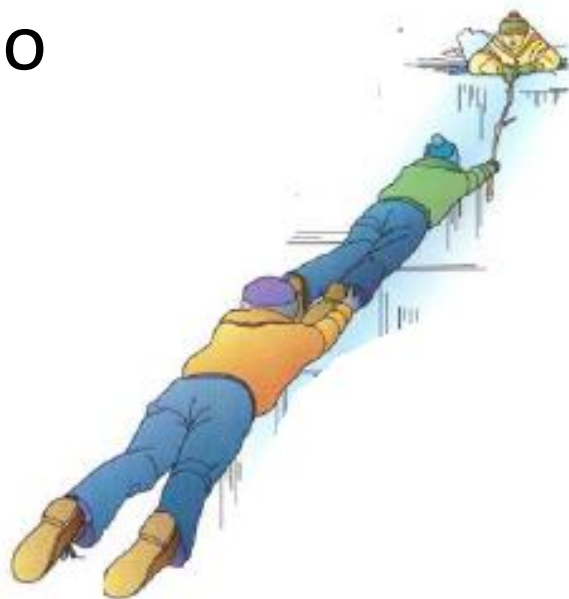

Example Req 3d

- Reach
- Throw
- Row
- Go

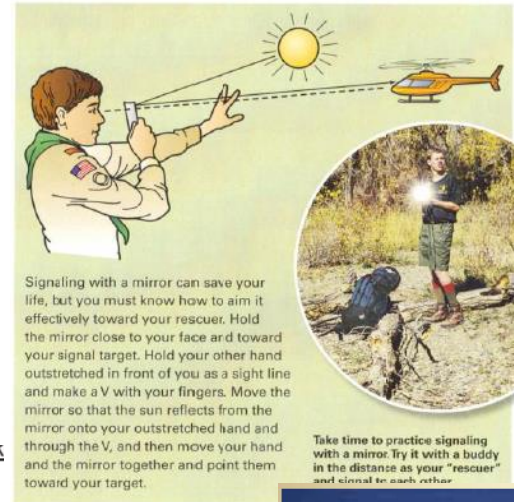

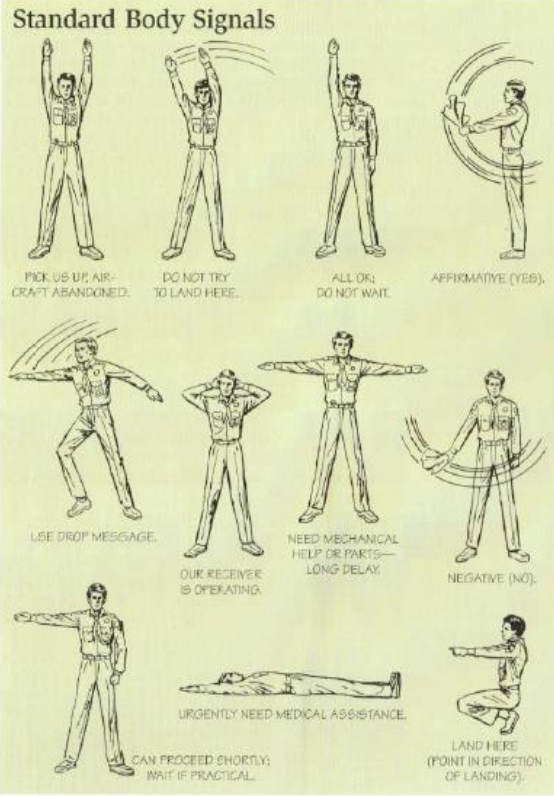

Since we are doing nonswimming rescues, you can demonstrate these in your backyard on dry land.

Hints for Req 4

Take time to practice signaling with a mirror. Try it with a buddy in the distance as your "rescuer" and signal to each other.

You may also light three fires to signal for help. Build them either in a line or in a triangle, and get them good and hot. When you see a rescue plane during daylight hours, add green plant matter to the flames. This should cause thick smoke. Be careful to not extinguish the fire by doing this.

Hints for Req 4

Ground-Air Visual Code for Use by Survivors
